MA and NH FY2015 Permits for EJSCREEN 110414.xlsx

Deborah,

Here is the list of backlogged individual permits we are or could be working on in FY2015 that I send to GIS for mapping with EJScreen. I am hoping to have those maps for our meeting 11/20/15 at 10:00 in the Mt. Greylock Room.

In addition to issuing these individual permits (listed in attachments) we will be defending appeals on the Charles River and GE Lynn permits, issuing municipal stormwater general permits in MA and NH, and working on non-stormwater general permits for wastewater discharges from hydroelectric dams, potable drinking water facilities, dewatering operations, groundwater remediation sites.

Subject: Thursday Meeting

Dave,

We are planning our work for 2015-2016. What are the permits you are planning to begin drafting and/or issuing? Prior to the meeting, we would like to know what permits you will need

our support on. We would like to do some advance work, so as to maximize the discussion.

Thanks

Deborah
